

Latex Allergy or Sensitivity

When putting on latex gloves, have you ever experienced the following symptoms or reactions:

- Skin rash?
- Feel itchy?
- Break out in hives?
- Develop a runny nose or scratchy throat?
- Have itchy eyes, sneezing or difficulty breathing?

If the answer is yes, you might have a latex allergy. Be aware that many medical products may contain latex. If you believe you may have a latex allergy or sensitivity, avoid their use and explore alternatives. If you develop a serious allergic reaction, seek medical treatment immediately.
