

Shake It Out and Stay Safe with Salt/Sand Shaker Bottles

Winter slips and falls are one of the leading causes of workplace injuries and contribute greatly to workers' compensation costs. In fact, for United Heartland policy years from 2010 to 2014, **the average total incurred cost for falls on snow and ice was \$11,511!**

Often these slips and falls occur as people step out of their vehicles to arrive at work or as they're leaving for home. To help reduce the risk, United Heartland is providing your organization the opportunity to purchase these salt/sand shakers directly from our vendor at a discounted cost.

Fill the shakers with sand or salt and store them in a common area where employees can grab and use them as needed. The shakers are designed to fit in vehicle cupholders for convenient access. It's a great tool that might help them stay on their feet and avoid injury when slick weather arrives!
