

# Resources for Machine Safeguarding, Lockout and Electrical Safety

Offering your employees a variety of ways to regularly gain safety knowledge is the best way to ensure that they know how to work safely and what to do in an emergency. With United Heartland's online safety training modules, you choose an administrator to monitor and track employee progress, so you will know that your employees are getting the training they need. Workers can view the many different modules from their computer monitor and are provided with a short test after each program, ensuring they understand the materials. Certificates of completion can be printed and presented to successful students.

## Training Resources

Training is an important part of any safety program. United Heartland Loss Control is here to assist you in reviewing your training needs and offering consultation to improve its effectiveness. As outlined below, our video and online training resources are available for customers who wish to complement their current training systems. Contact your United Heartland Loss Control representative to discuss your current needs or explore the United Heartland Toolbox at [www.unitedheartland.com/united-heartland-toolbox/](http://www.unitedheartland.com/united-heartland-toolbox/) to find more loss control resources.

### Lezage Online Safety Courses (Free, streaming video only)

The Lezage Training Center provides many safety training topics which can be utilized as individual training or presented to a group as a group safety training program. The training presentation can be completed in approximately 30 minutes, and can be paused and restarted to allow for discussion points.
