

Are You Ready for Winter Weather?

United Heartland encourages all of our customers to think about how best to prepare for winter weather. There are a variety of things to think about before the first snowfall, including:

- Ensuring you have access to weather advisory alert systems
- Tuning up snow blowers and other snow removal equipment
- Hiring a snow removal contractor
- Having a plan in place when off-premise work is necessary
- Maintaining a supply of salt and other ice melters
- Obtaining proper footwear for the winter season
- Putting entryway mats and housekeeping supplies in place
- And more

Be sure to visit our WalkSafe campaign at **UnitedHeartland.com/walksafe** for more information on each of these topics throughout the season.

By planning and preparing now, you'll be well on your way to keeping employees safer all winter long.
